

Early College Program Placement Test

Part of the application process for the Early College Program at Suffolk County Community College is to complete an untimed placement test. The test that SCCC uses is called the ACCUPLACER, and it is administered by the College Board. Once your application is received, you will be invited to schedule an appointment to take the test at SCCC.

It is a totally computerized test in reading, English and math (arithmetic and algebra). You will take the following sections of the test: Sentence Skills, Reading Comprehension, Arithmetic, and Algebra. You will not be taking the Write Placer writing sample, College Level Math or ESL portions of the test.

Detailed information about the ACCUPLACER can be found at <https://accuplacer.collegeboard.org/>.

You can practice for the test with a free web-based study app found at <https://accuplacerpractice.collegeboard.org>.
